

I respectfully ask that you deny and reject the NAB's petition 04-160 to limit XM satellite radio's ability to program local trafic and weather. I choose to listen to satellite radio because it offers a large choice, it is quality radio and it meets my needs. I pay for this service. I would like to think that they can purchase the support they deserve locally and should not be turned around by local stations who have a lot of concern about this new format because it GOOD RADIO.

That is why I chose it to begin with. They have as much right to the airwaves as the locals.

Thank you.
